

Residential Solar Power 101

Solar PV systems are an investment in energy security and dependence. Evidence from the US and Canada have found that adding solar increases the value and saleability of a residential property.

Monday – June 20 – 11:00 a.m.

This session was planned for the 2022 conference, but cancelled due to health concerns, and is now offered free of charge to all members. Certified members (AMAA) will collect one (1) learning credit for the session. The Alberta Assessors' Association acknowledges, with thanks, its collaboration with Solar Alberta to deliver this presentation to members.
